EXPERIENCE

Rider, Durham, NC — *Founder, Team-Lead, Front-End Developer*

April 2016 - PRESENT

- Created and pitched a plan for Rider, an app that compares prices and ETAs for forms of transportation from Uber, Lyft, local taxis to public transportation
- Designed and developed the front-end mobile version using HTML, Sass, JavaScript, jQuery and AngularJS deployed on firebase
- Managed and collaborated with a team of Ruby-On-Rails and Front-End developers to execute a working app within 2.5 weeks

GrupoMYT/MYT Partners, New York, NY — *HR Manager*

February 2013 - June 2015

- Designed HTML/CSS marketing emails, promotions and aided in improvements in the restaurant's mobile apps.
- Created the onboarding process, training manual and program for entry level positions for a restaurant group.
- Led the development of 4 new restaurant openings during my tenure.
- Was in charge of payroll processing, employee grievances and policy implementation for 80 employees.

EDUCATION

The Iron Yard, Durham, NC — *Front-End Engineering*

February 2016 - April 2016

- Attended an immersive program focusing on the languages HTML, CSS and JavaScript, including its libraries, templating and frameworks.
- Work weeks of 60-80 hours consisted of both individual and team project-based learning, utilizing version control, agile development and UX principles.
